

Magic Snowflake Paper Toy

- Cut out the design very precisely.
- Gently score/trace (do NOT cut) all the diagonal and vertical lines, as indicated by the pattern.
- Bend and fold into shape (see blog for photo tutorial), and close the snake-like form with glue (use quick drying paper glue), starting with the 'glue 1' bits, and do them one section at a time.
- Close the snake by adding a generous amount of glue to the end flaps - 'glue 2' - and push them into the tail end of the snake.
- Hold on and press in place, until the all of the glued bits have a steady hold - and start playing with the kaleidocycle!
