

# BIG STRIPEY STAR 2014 / Star center

Print once, and fold and glue into a 20 sided ball. When the glue is dry, start adding the star beams, one by one. If you make this your top star, simply cut a hole in one of the triangles before attaching the beams and leave out that beam. Trace all lines lightly with a knife or needle before folding, this will make the job easier and folds very precise.
