

19 x 19 cm. origami squares for Valentines *tato* or *menko* folded letters.

For these designs, pattern on both sides of the paper looks great, so this PDF has two pages, with the square pattern exactly centered. Print page 1, then turn over the paper, put it back in the printer and print page two. Simple as that. The page two pattern has a 5 mm. bleed (meaning it's slightly bigger than page one) to compensate for small irregularities by the printer. Use a knife and steel ruler to cut the squares very precisely, use the crop marks on page one. Happy folding!
